

# TELEPHONE CONVERSATION RECORD

DATE OF CALL March 1, 1988 TIME OF CALL 1545

PERSON CONTACTED Don Miller

COMPANY Missouri Geologic Survey TITLE Geologist

SUBJECT OF CALL Hydrogeology and Structural TELEPHONE # 314-364-1752  
features in the Big R or Mine To 1/2 S & C area

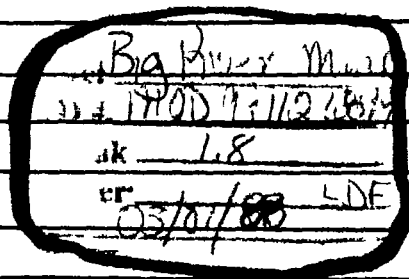

CONVERSATION Mr. Miller explained to me that the  
Bonnetere and Larnett formations were both aquifers.  
But the Bonnetere is very limited flow of 10-15  
gallons per minute (gpm). The Larnett can reach  
100 gpm.

He stated that the area of concern in  
St. Francois County is characteristically an  
area associated with faults and folds. This tectonic  
activity is related to the St. Francois Mountains uplift
